**DEXTER DX800 TRACK**

**ROLLER-BASED SCISSOR LIFT**

**NEW!**

## NEW scissor lift DX800

We have developed a completely new multipurpose scissor lift. The DX800, as a tracked model, is very off-road.

DX800 Track's sister models DX800 Skyman™ (towable) and 4WD (4-wheel drive with rubber tires) are suitable for use in easier off-road conditions.

The new electronic stepless control makes the lift very comfortable and safe to use. The lift is equipped with automatically leveling outriggers, which makes the lift easier and faster to use. After use, the support legs of the lift can be automatically returned to the transport position at the touch of a button. The outriggers are designed to level the lift on very sloping platforms, such as ramps.

The compact size and removable handrails make it easier to get to the work site. The movable work surface expands the working area and enables working over small obstacles.

The DX800 is available in a fully electric, AC and battery version. A full hybrid version with mains power, internal combustion engine and battery power is also available.

# DX800 TRACK

The new DX 800 Track enables the use of an easy-to-use scissor lift even in very difficult places. Thanks to its powerful track traction and its narrow size, it moves easily on the ground, but is equally suitable for use indoors with unmarked rubber rollers.

## MAX WORKING HEIGHT

8,00 m

## MAX PLATFORM HEIGHT

6,00 m

## OUTREACH

0,85 m

## WORKING WIDTH

max 1,52 m

## MAX LOAD

300 kg

## PLATFORM SIZE (l x w x h)

2,20 m x 1,00 m x 1,10 m

## PLATFORM CONTROL

proportional electric control

## MACHINE LENGTH

2,72 m

## MACHINE WIDTH

1,00 m

## MACHINE HEIGHT

2,29 m (without rails 1,42 m)

## MACHINE WEIGHT

1 465 kg

## STANDARD POWER SOURCE

230 V / 50 Hz / 1,9 kW

## PETROL ENGINE

optional

## TRACTION DRIVE

standard

## GRADEABILITY

35 %

## Accessories:

- gasoline engine (Honda)
- battery powered
- hybrid powered
